

Kato Van Mulders

Applied Computer Science Student | Full Stack Development

Opwijk, Belgium · kato.vanmulders07@gmail.com · +32 468 46 09 73 · katovanmulders.dev · [LinkedIn](#) · [GitHub](#)

PROFILE

Applied Computer Science student at HOGENT, specializing in Full Stack Development. Experience spans IT support and Windows 11 deployment, digital archiving of sensitive municipal records, and logistics — work that required accuracy, independence, and discretion. Builds practical tools to solve real problems and is looking for a student job or internship to grow as a developer within a team.

EXPERIENCE

Student Admin & Digital Archiving — Gemeente Lebbeke

Aug 2026 – Sep 2026

- Digitized and reorganized the municipality's physical archive of building permits and land records dating back to the 1890s, working independently from a task list
- Cross-checked documents against the existing numbering system to identify and recover missing files
- Built and maintained an Excel inventory with formulas to track digitization progress
- Redacted personal data from documents prior to external release, per confidentiality requirements
- Developed a browser-based tool for merging PDFs and removing blank scanned pages; handed it over with documentation for the team to use

Student IT Assistant — Gemeente Lebbeke

Aug 2025 – Sep 2025

- Carried out the Windows 10 to Windows 11 migration of municipal laptops as the only student on a four-person IT team, upgrading around 5 devices per day
- Performed disk imaging, BitLocker encryption, clean OS installs, BIOS diagnostics, and device configuration in Active Directory
- Rolled out software fleet-wide using PDQ Deploy & Inventory
- Delivered 2–3 in-person laptop handovers daily to staff across the town hall, schools, library, daycare, and retirement home
- Provided phone, on-site, and remote (TightVNC) support for hardware, Outlook, licensing, and printer issues
- Documented procedures and diagnostics in OneNote; tracked rollout status in Excel

Logistics Employee — ZEB Logistics

Dec 2024

- Picked orders and supported daily warehouse operations, working quickly and accurately under time pressure

EDUCATION
